

Renex 120 F

Universal cleaning agent

Approved for food industry application

Renex 120 F is an alcalic powerfull cleaning agent for industrial use.

Renex 120 F can be used for cleaning all surfaces which(if these surfaces can not withstand water),such as; Floors, Walls, interior, bulk tanks and containers and machinery etc.

Renex 120 F has a good dissolving effect on all kinds of domestic grease which makes is useful in meat industry and food industry in general.

Renex 120 F can also be used to clean conveyor belts, truck trailers, containers and cooling houses.

APPLICATION:

15-30 ml. pr. liter of Renex 120 F is mixed into cold or hot water. This is equivalent to 1-2 deciliters in a regular size bucket.

For dissolving old grease and fat deposits it is recommended to use a 4 times stronger solution with 5-15 deciliters of Renex 120 F and always in hot water. When used in food industry all surfaces which come into direct contact with meat should be Flushed carefully with clean water.

If Renex 120F is frequently used on vinyl- and linoleum floors, degreasing of the surface will happen and it is recommended to use an oily product for surface treatment when necessary.

TECHNICAL DATA:

Composition: Phosfates, anionactive syndeter, water & preservatives

Ph-value: Concentrated: 10 , Diluted: 8-9

Bio- degradability: Fully degradable

HEALTH AND SAFETY:

The product was formulated such as to maximize effect but with minimal negative effect on the health of the user. Therefore no solvents or ammonia has been used in the formulation of this product.

However as Renex 120 F is quite alcalic, it will have a drying effect on skin which can result in cracks or even eczema in rare cases. Therefore it is highly recommended to always use rubber gloves when using any of our Renex or Renci products.

It is also recommended to use safety glasses(especially when using higher concentrations).

For more info. please always read the (MSDS)Material Safety DataSheet before using any new product.

PACKAGING:

Renex 120 F is supplied in 5 liter, 27 liter, 200 liter drums and 1000 liter IBC. Bulk delivery is also possible.
